

Find your size

1. Print the document in A4 format and make sure the page scale is set to "none" in the print options.
2. Measure the line on the side and check that this is exactly 1,9685 inch long.
3. If the measurement is not accurate, check that you are printing in "full size" and reprint.
4. Be careful not to select the "Fit to Page" print option.

1. Choose a ring in your possession.
2. Place the ring above the circles below until you find one in which the circumference is printed it's just visible inside your ring.
3. If a ring falls between two sizes, we recommend that you use the larger size.
